

Harmony 25 Electric Launch

Cedar/fiberglass/epoxy construction to 100 year old design.

Cruise in silence for 40 miles at 7 mph. Recharge overnight.

Dennis Wolfe 810-765-1229 WWW.WOLFEBOATS.COM

The Harmony 25 was conceived to be the perfect boat for elegant relaxed cruising. She can carry eight people out for a ride or seat four people for a placid nautical dinner. She is quiet enough to enjoy conversation with classical music in the background or sneak up on a heron. No engine noise, exhaust fumes or vibration.

Her hull is so slippery that she only consumes a tiny bit of energy; top speed with the six hp motor is 8.5 mph and two hp is all that is needed to cruise at seven mph. The batteries will provide five hours, 35 miles, range at this speed. Slow just a little to 6.5 mph and she can cruise for 50 miles. Plug the boat into a regular 120v household outlet and recharge the batteries overnight for about \$1.00.

Every aspect of the boat is engineered for high performance and low maintenance. The hull is a composite of cedar strips sandwiched between layers of fiberglass set in epoxy. The decks are Dynel cloth / epoxy but look just like old time canvas. There is just enough varnished wood to accent the sleek lines. Wear surfaces on the seats and floor are oiled Garapa, a Brazilian hardwood similar to teak in hardness and weather resistance. The inevitable dirt and scuffs can be washed off and a quick wipe down with teak oil will restore the wood to like new condition.

Best of all the electric drive system requires no more maintenance than your cell phone. Just plug it in to recharge. A built in smart charger takes care of the premium AGM batteries, which never need water nor give off toxic fumes. No oil changes, no tune ups, no winterizing. Just plug it in. Really.

Specifications: LOA 25', Beam 5'11", Draft 1'5", Empty weight with batteries 1720 lbs.

Standard Features: MARS 6hp brushless AC motor - Sevcon PMAC controller - eight 6 volt 220 ah Concorde Lifeline AGM deep cycle batteries - Link 10 energy monitor - DeltaQ smart charger - Jensen four speaker marine stereo / CD player with iPod jack - Hummingbird color GPS/sounder - Brass hardware - Custom dual axle aluminum trailer.

Available for immediate delivery - \$59,000.
